

**Sunbeam Institute of Information Technology
Pune and Karad**

Module - Concepts of Operating System

Trainer - Devendra Dhande
Email – devendra.dhande@sunbeaminfo.com

1983 - GNU (GNU Not UNIX)

GPL (General Public License)

Linux distributions
(www.distrowatch.com)

Linux kernel source code
(www.kernel.org)

Everything is File

File : collection of data

File : data + metadata

(Actual
content)

(data blocks)

(information
about file)

(File Control Block)
(FCB)

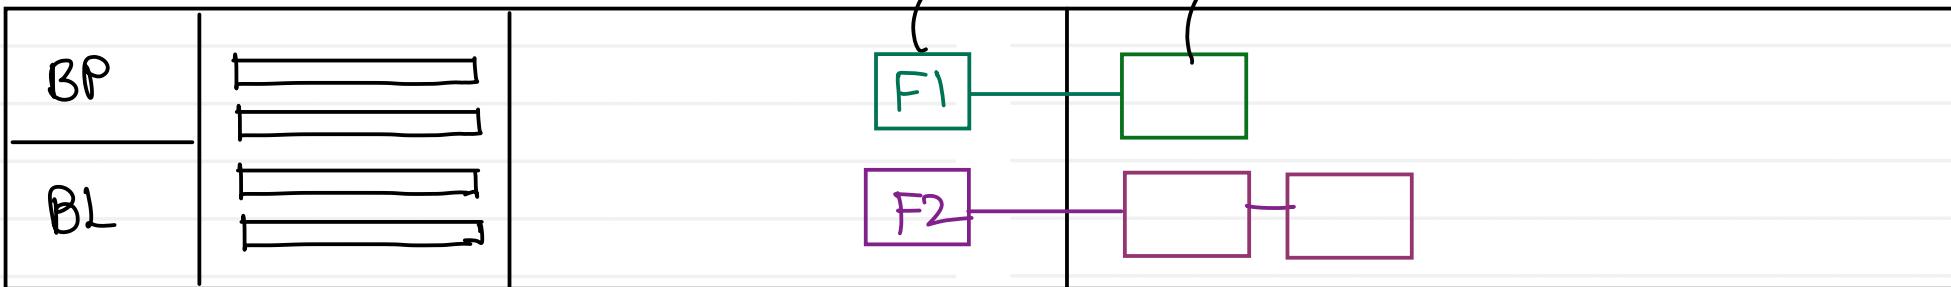

- name
- size
- owner/group
- permissions
 - read/write/execute
 - user/group/others
- timestamps
 - create/modify/access
- type
- no. of links
- info about data blocks of file

FCB - Inode
Uniquely identified
by inode no.

Master File Table - Inode List
Volume Control block - Super block
Boot sector - Boot block

File system : Organizing files on partitions

Harddisk (Partition) :

Boot sector Volume Control block

↓
Programs required
for booting of
OS

1. Bootstrap program
2. Boot loader program

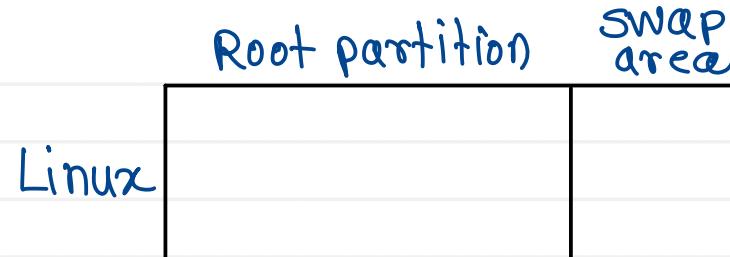

Master File Table

- info about volume
- label
 - size
 - filled, empty
 - info about free data blocks of that volume

Data Blocks

- size of data block is always fixed but it is configurable at the time of formatting

$$\text{size} = 4096 \text{ bytes}$$

- linux follows "root file structure"
- starting point is root which is denoted by '/' (directory)

/

1. Absolute path

- always starts with '/'

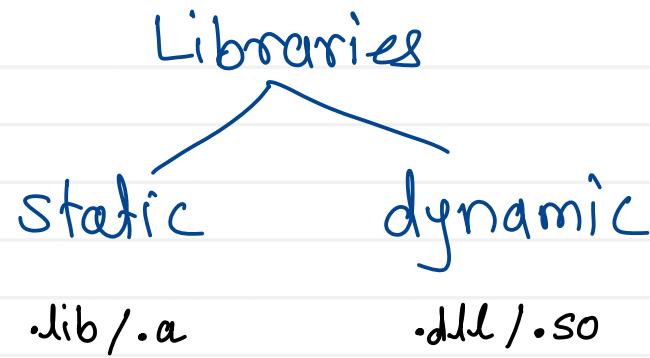

/home/sunbeam/OSC/Assignments/assign01.pdf

2. Relative path

- always starts w.r.t current/present working directory

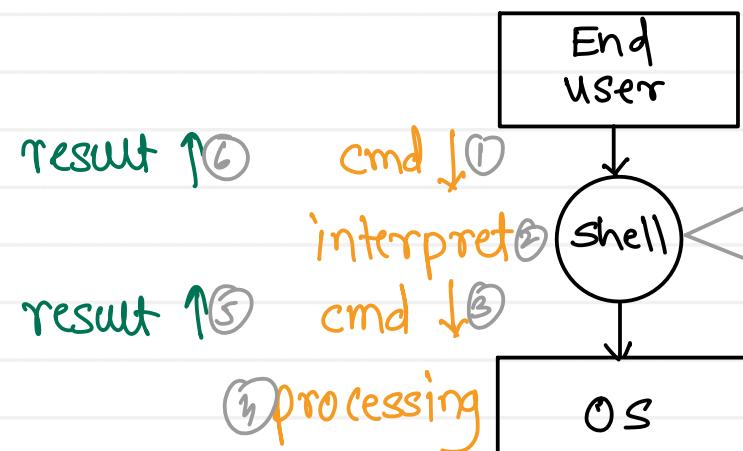

OSC/Assignments/assign01.pdf

File — file
folder — directory
Administrator — super user
admin — root
pseudo file system

User Interfacing

- user interfacing is provided by one of the programs & it is called as "shell"
- shell is an intermediate b/w OS & user
- shell is a command interpreter

- in Ubuntu default shell is 'bash'
- BASH - Bourne Again Shell
- echo \$SHELL - will show default shell
- chsh - to change default shell

- CLI based shell (Command Line Interface)
- Windows - cmd.exe, powershell.exe
- Linux - bsh(sh), bash, csh, ksh, zsh
- GUI based shell (Graphical User Interface)
- Windows - explorer.exe
- Linux - KDE (Kommand Desktop Env)
- GNOME
- (GNU Network Object Model Env)

Thank you!!!
